

Coller Theme Documentation

released under GPL v3.0

Thank you for Downloading Coller WordPress theme. This is one of the easiest WordPress themes to Use. However, there are certain things which may be a little difficult to understand for relatively new users. Hence, this Documentation consists of all theme specific features.

For Basics of WordPress: Please Refer to the Following Articles:

1. [Install the WordPress theme.](#)
2. [Setting Up Post Thumbnails.](#)
3. [Disabling Comments](#)
4. [Using Static Front Page](#)

For More Help regarding, using the theme please refer to the rest of the contents of this Documentation. If you still find any issue or to report a bug, please use the following [Coller Support Forum](#).

Contents at a Glance

1. Basic Settings
2. Slider Settings
3. Social Settings

Basic Settings

Basic Settings include options to configure the Logo, and include some Code.

Logo - For best results use a Logo of size 360x125px.

Header Scripts - It is meant to enclose some javascript enclosed within `<script>` and `</script>` tags.

Footer Scripts - It is meant to enclose some javascript enclosed within `<script>` and `</script>` tags. But, this will be placed just before the closing `</body>` tag. This is ideal for analytics script.

Copyright Text - This text will be displayed in the left region of the footer.

Custom CSS - To include some styling to modify colors,width, etc in the theme. Use this if you have some CSS knowledge. No need to include `<style>` and `</style>` tags. Directly input css.

Slider Settings

The Slider is very easy to use. You need to manually input/upload the images. This slider supports upto 5 Images with a title and URL.

If you wish to use only 3 images, then fill up only the fields corresponding to the first 3 images, and leave all the others.

FAQ Regarding Slider

Can we change the width of Slider? - No.

What is the Ideal Image Size for the Slider? - Any Width Greater than 1100px.

To Make the Slider look best, it is recommended that you use all images of the exact same size. To make the images of the same size, you can use PhotoShop, or any other image editor software. There are online image resizers are also available.

Social Settings

The Social Settings is relatively easy to configure. Just one thing you need to take care of is that you need to enter the complete URL for all fields, except Twitter, where you just need to enter the username.

This theme has been created by Rohit Tripathi, rohitink.com © 2013-14.
